

```

public class Account {
    private double balance;

    public void deposit(double amt) {
        this.balance += amt;
    }

    public double getBalance() {
        return this.balance;
    }
}

public class AccountExample {
    public static void main(String[] args) {
        Account rahulAcc = new Account();
        Account swethaAcc = new Account();
        swethaAcc.deposit(45000);
        System.out.println(swethaAcc.getBalance());
    }
}
